

# How to make your Multi-Cloud Strategy both agile and secure

**TWO THIRDS** of organizations believe that the multi-cloud way is the best way...

**71%** ...while **71%** see cloud orchestration as central to their digital transformation...

...and a staggering **91%** want to move workloads between clouds. It's clearly time to act!

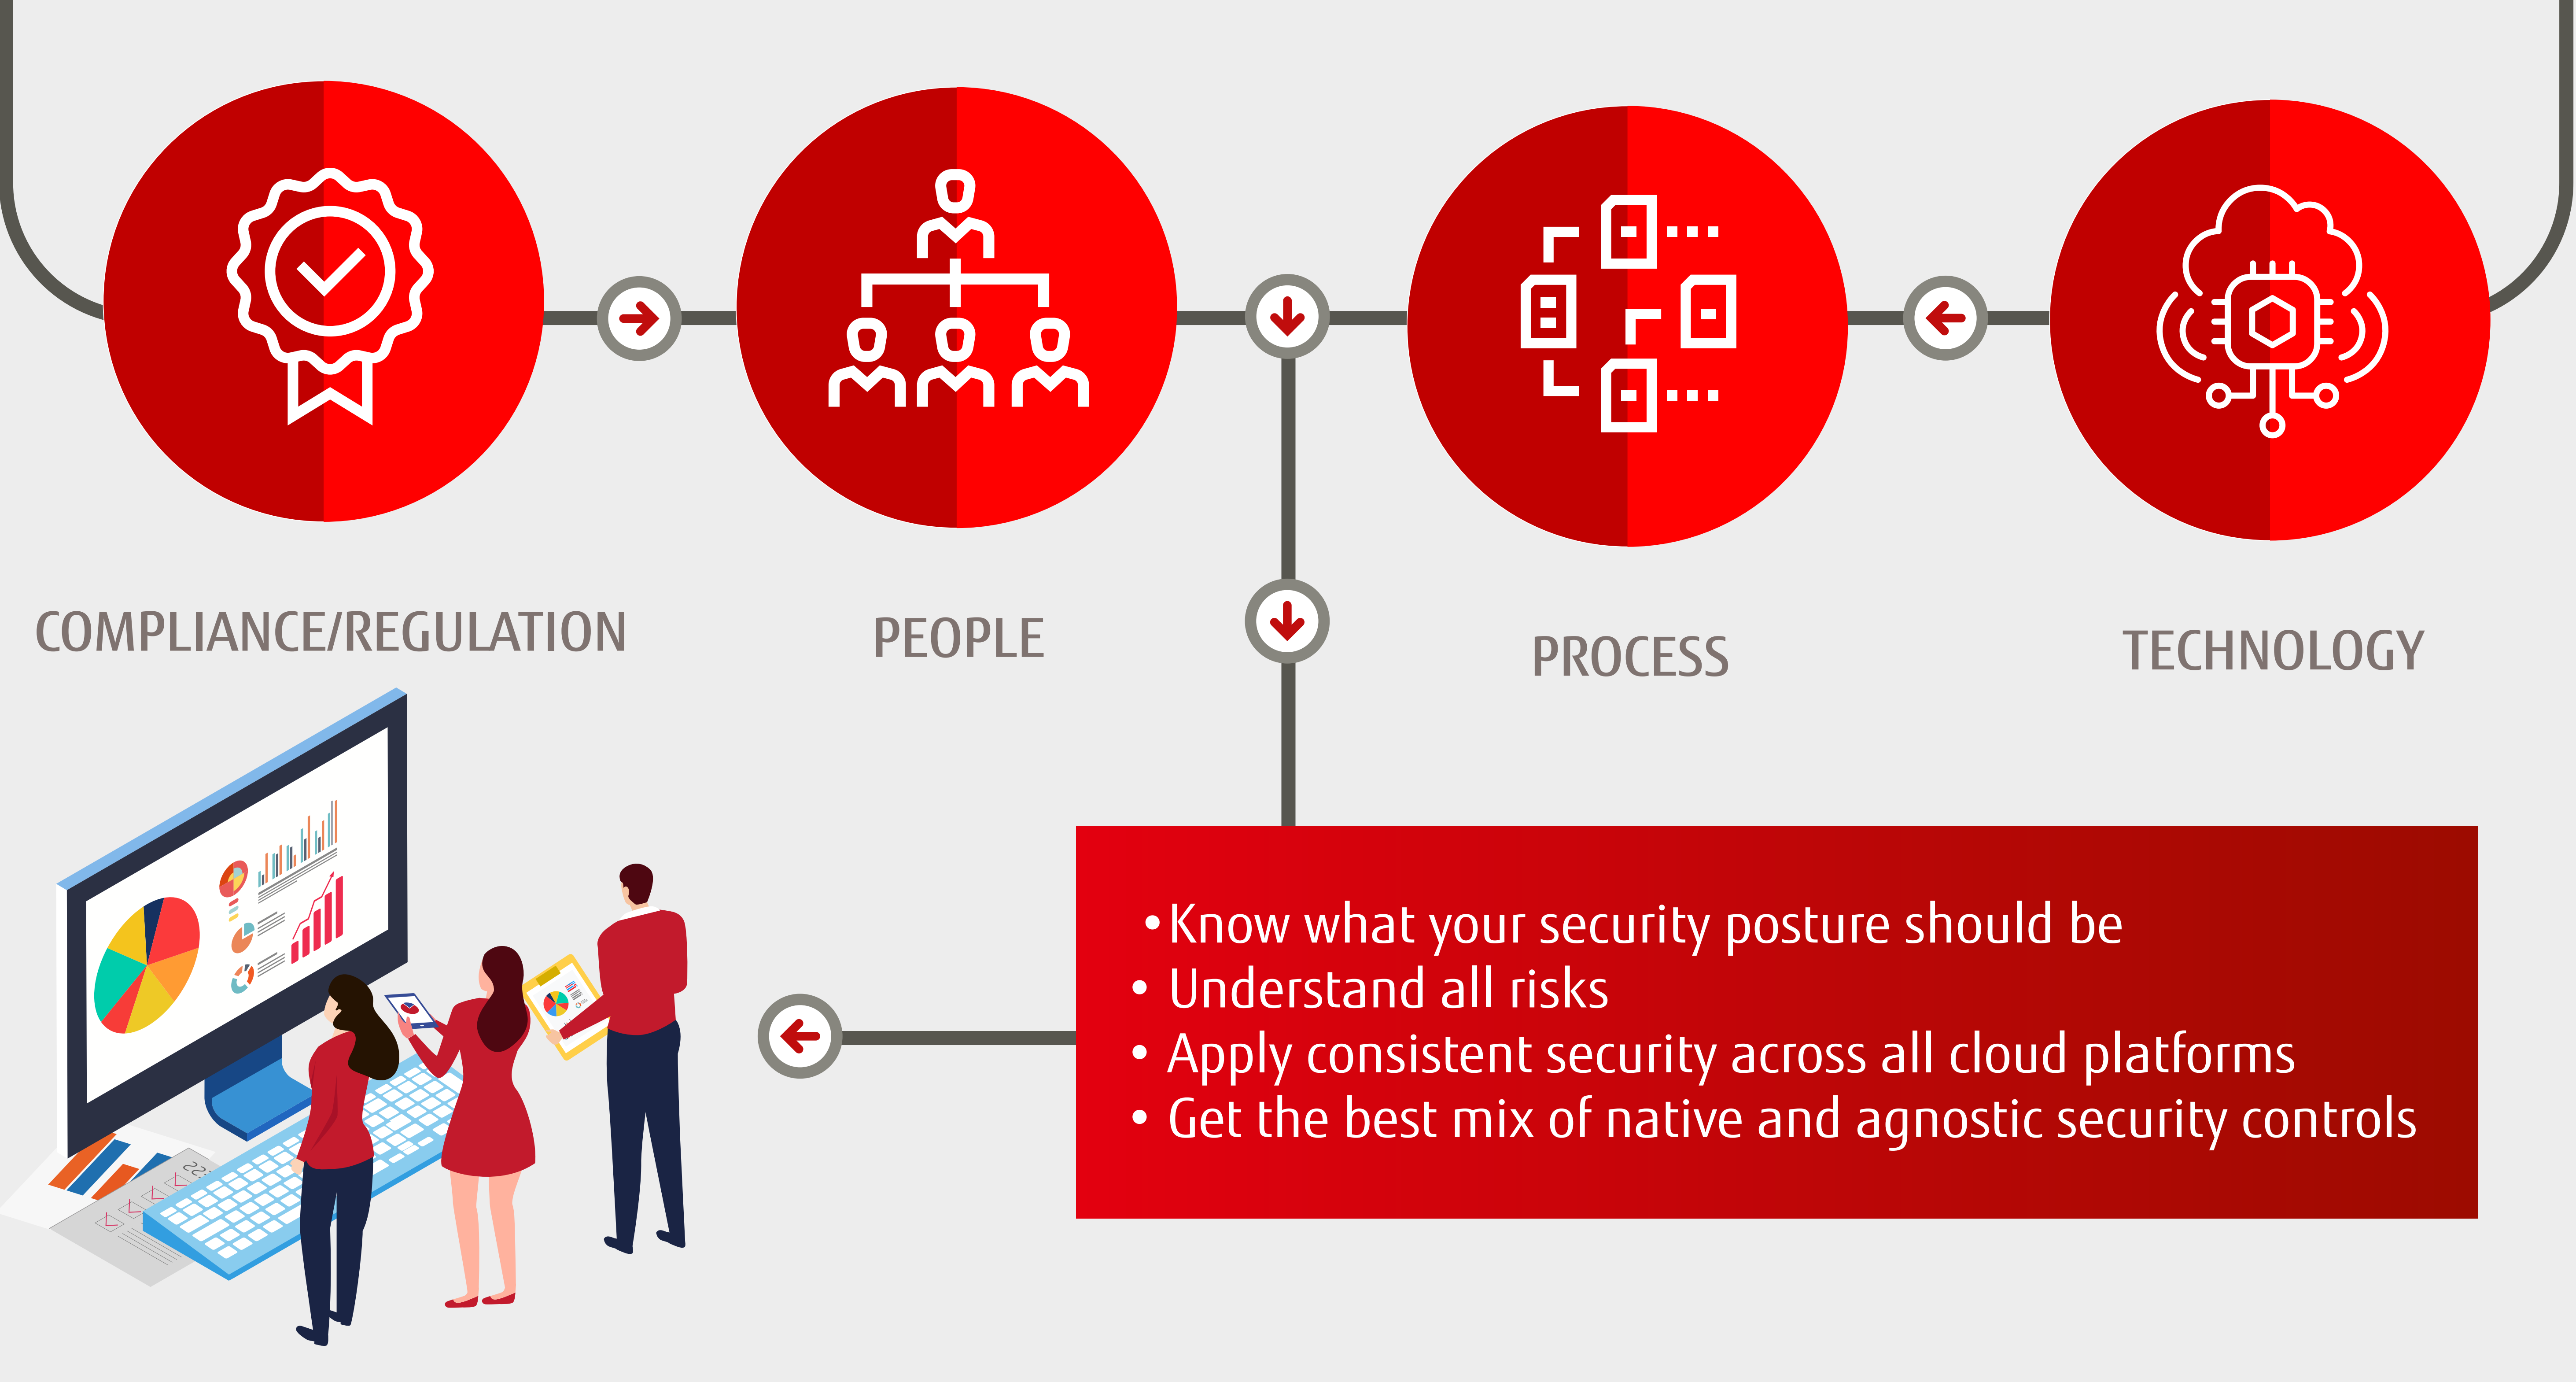

Start with security and define responsibilities to avoid complexity in the long term.

**Red** = Customer's responsibility  
**Grey** = Cloud Service Provider's responsibility

	On-Prem	IaaS	PaaS	SaaS	
Data Governance & Right Management	Red	Red	Red	Red	Always retained by customer
Client Endpoints	Red	Red	Red	Red	
Accounts Access & Management	Red	Red	Red	Red	Varies by service
Identity & Directory Infrastructure	Red	Red	Red	Red	
Application	Red	Red	Red	Red	Transfers to Cloud Service Provider
Network Controls	Red	Red	Red	Red	
Virtual Operating System	Red	Red	Red	Red	
Physical Hosts	Red	Grey	Grey	Grey	
Physical Network	Red	Grey	Grey	Grey	
Physical Datacentre	Red	Grey	Grey	Grey	

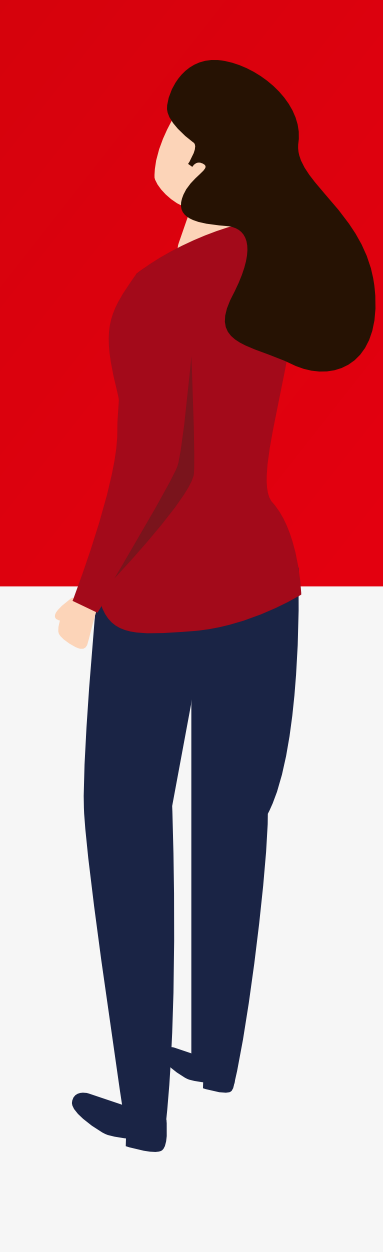

## Get it right at the start to ensure resilience and be compliant in terms of data protection.

## Fujitsu's deep experience in making the multi-cloud deliver multiple benefits for thriving enterprises is an asset you can't overlook.

**Multi-cloud works.**  
But only if it's secure and seamless. We have the experience, expertise, and solutions to secure your multi-cloud.
