

FUJITSU Work Life Shift

The Secure Remote Working solution

New, flexible ways of working demand enhanced security. Secure Remote Working exploits industry-leading cloud platforms to increase both resilience and agility.

With it, organizations like yours can work securely from anywhere, on any device. Benefit from better access to – and retention of – key talent. Reduce property costs. And drive greater sustainability.

shaping tomorrow with you

FUJITSU

Secure remote working for the new reality

The world is going through unpredictable change; to survive and prosper, your organization has to pursue adaptability. At the same time, our environment and society are facing unprecedented challenges; we all have to reimagine how we live and work.

We call this **FUJITSU Work Life Shift**

To cope with this fundamental change, companies need to provide their workforces with flexible, highly scalable, and secure access to their desktops and applications – from the cloud, to any device, anywhere.

How secure flexible working gives employees what they need

Secure Remote Working combines our deep expertise in delivering complex digital workplace solutions with industry leading management tools and technology. With it, you can:

- Create an **office-like user experience**, remotely, over any network, on any device.
- Provide access to **corporate data** and **business-critical applications**.
- **Implement and scale quickly**, in as little as a week for some use cases.
- **Run applications and desktops** independently of the device's operating system and interface.
- **Secure your workplace** with customizable security policies.
- Guarantee access, with only **512 kb/s** required from the user's remote location.
- **Implement without CAPEX** investment.

Service options

Core

- Stay safe with **security features** including delegated admin, smartcard support, and integrated SSL.
- Host **virtual apps** and desktops in Microsoft Azure.
- Improve **user experience** with shared, persistent, and dedicated desktops, availability on all devices, and optimizations for Office 365.

Expanded

- Gain **additional security features** such as granular access to resources and functionality, data leak prevention, enhanced compliance and tracing, and session recording.
- Benefit from **multi-cloud orchestration for virtual apps and desktops**, which provides:
 - Automatic scale-up of Azure WVD to meet demand.
 - Unified management of all corporate workspace services.
 - Easy expansion of WVD services across the entire enterprise.
- Enhance **user experience** even further, with performance analytics, access to client side peripherals, and seamless transition between mobile and stationary workplaces.

Whichever you choose, we can tailor both to your individual needs and maturity.

Our value-based approach explained

Secure Remote Working is more than a technology deployment. As a Gold Microsoft partner and Citrix Global Service Integrator for the second year running, we can help you achieve the maximum benefits from a flexible, agile, engaged workforce. While getting the most value from your technology investment. Opt for our end-to-end delivery, and we'll guide you through three, distinct phases. These are:

Value assessment

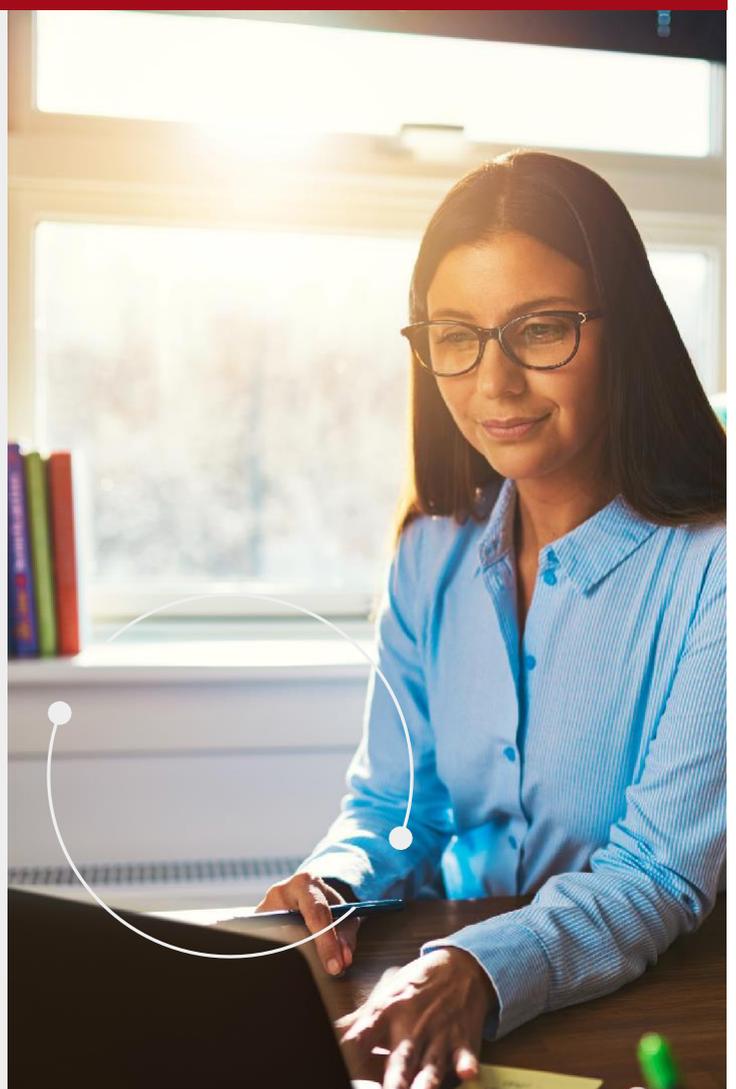

We'll identify your needs and value, while plotting technical delivery detail.

Transformation

This agile delivery phase focuses on driving sustainable, value-adding change for your organization.

Managed service

Throughout the contracted support period, we deliver ongoing value by providing insightful recommendations for improvement and change. This delivers continuous value to your organization.

Your organization's benefits

Armed with industry-leading cloud platforms and Fujitsu expertise, you'll benefit from a complete, intelligent, secure solution delivery that:

Reduces costs

By enabling your people to work securely from home, you can consolidate your property portfolio, reduce travel costs, and eliminate the need for dedicated service continuity sites – creating a huge potential for cost savings.

Improves agility

With secure, remote access that rapidly scales in line with demand, you can quickly provide access to business systems for partners, suppliers, and the gig-economy – as and when needed. It also becomes easier to support robotic process automation.

Provides greater access to skills and improves diversity

By freeing people from the physical constraints of the office, you can create an environment that aligns to changing workplace expectations. This will open you up to a more diverse and inclusive workforce.

Increases resilience on every device

And, by enabling your workforce to be productive from anywhere – using corporate or personal devices – you can become more resilient against unpredictable, uncontrollable changes.

Why Fujitsu?

Ready to pick a partner? We combine an unparalleled breadth of Microsoft cloud solutions with global expertise. So, you can expect excellence, delivered.

We manage over 8 million desktop devices worldwide

Our mobility solutions are device, carrier, and data-source agnostic
